

# Eye Protection Awareness

 Cleanline Tasman

## Have you ever felt the excruciating pain and annoyance of getting something stuck in your eye?

The type of pain that makes your eyes water and you're advised not to rub it, but all you can think about doing is... rubbing it?

Yep, we've all felt that pain, and the risk of such a conundrum is only heightened when it comes to a workplace setting. With dangerous debris and hazardous chemicals all around, it's a must to have a good pair of safety specs

Here's some good news- We've got some pretty cool specs in our Mustang range that you need to check out. Read on for more info...

***If you are wearing the most appropriate PPE, the likelihood of an injury is very slim. This does not mean you should be complacent when it comes to your knowledge on dealing with one if it ever occurs.***

*Being able to act fast if any of these situations occur in the workplace is vital in minimizing any harm to the eye and your vision.*

Click on the icons to learn how to deal with the following injuries!

**Cut, Puncture or Embedded object**

**Dust or Loose Particle in the Eye**

**Chemical Splash**

Our newest and most innovative safety spec yet. Introducing the...

### Reflex Safety Spec

The fit of this spec is undeniably comfortable, the flexible arms make it feel almost like a second skin as it shapes to your face and stays put all day long.

With clear, smoke, and bronze options, you'll find a suitable pair for all applications.

Try a pair out for yourself and see what all the hype is about -

See what the hype is about!

Our Mustang Reflex Spec is pretty sweet, but we have a few more in our range that you need to see.

The Base spec is the ultimate safety spec for those on a budget. This basic design makes it perfect for those wanting something solid, but don't have the capacity to spend a premium. This is a perfect start up spec and can be used in most working environments.

Our Origin spec is our premium range, and quite frankly one of the most premium specs on the market. When compared to the other "premium" specs out there, we'd back our Origins 100%. These specs sit comfortably on a wider face shape, with flexible temples, and a soft nose bridge that helps the spec stay put.

Need to try either of these specs out yourself and make your own call? Request a sample here -
